Size: 125,50,920

Trolley for laptops with function of battery charging is used to storage and easy transport of laptops. It is ideal for schools, colleges, libraries, conference halls, or anywhere where there is a need for secure storage and simultaneous laptops charging. Trolley WNL is particulary useful in a classroom, where students need to charge laptops and store them safely. Thanks to the mobile trolley WNL can be easily and safely moved with laptops from one class to another. WNL trolley is used to store, secure and charge simultaneously from 10 to 30 laptops. For the overload protection the sequencer is used, which enables to turn on the particular power strips after the specified time (~3 minutes) which results in a low maintenance of electrical load of the trolley during the charging process. A light-emitting diode is signalling the work of power strips of the laptop trolley. The door of the trolley are protected against unauthorized access by a key lock with locking in two points. Trolley Laptop WNL was awarded the European Medal. Work safety A sequencer and 2 fuses against overloading protect against overload lines. Mobility - easy moving thanks to swivel wheels diameter of 100mm covered in gum of nonmarking surface (2 of them with brakes). Ergonomics - handles mounted on both sides and top make it easy to use. Security - doors of the trolley are secured with a key lock in blocking. The trolley top is covered with melamine as a workspace. The frame has holes allowing for air circulation. Maximum laptop size: 90 x 340 x 470mm (17 inch). The trolley frame is made of metal sheet painted polysterepoxy. Trolley has a Certificate of Compliance to European
